Kris Becker and his debut album, "Inventions," is an exquisite collection of finely crafted compositions featuring the genres of Rock, Jazz, and Classical. Becker creates an album that is rich in musical style and shows his superb versatility in performing a collective mix of music. He is brilliant on the piano and this album is proof of his amazing talents. The first two tracks, "Feel The Truth" and "Try" groove with a solid foundation as these songs dive right into the Rock mode with terrific melodies and charming rhythms. Tracks 3 and 4, "In Due Time" and "If Ever Two Were One (Alt. Take)" offer some spectacular Jazz with crisp and bright horns that playfully cascade around the bright and colorful piano and soulful vocals that captures the essence of the sweet lyrics. Becker then takes you into his classical skills with dexterity and intense precision. "Fanfare For Life" will astonish you as Becker plays his original Classical piece with a rich musical complexity. Becker's Classical compositions are elegant and bursting with passion and rich embellishments as he performs with strong and strict timing and these compositions should be regarded as among the best. If you are a person who enjoys an album with a marvelous blend of Rock, Jazz, and Classical, then the distinctive album "Inventions," is just what you need to listen to.
